Project proposal description

Description of the project idea	“EcoSpace: Cross-Border Eco-Zones for Sustainable Communities” The project aims to create cross-border demonstration eco-zones in communities in Ukraine and Poland as open spaces for environmental education and the promotion of circular economy principles and responsible waste management. As part of the project, plans include the development of an open public eco-space on a cleared coastal area, in a park, or at other locations, which will combine recreational, environmental education, and demonstration functions for practical solutions in the field of sustainable development. The eco-zone will include: • benches and landscaping elements made from recycled materials; • containers for waste sorting; • a reuse point; • information stands; • an eco-trail with QR codes (interesting facts about nature, environmental solutions that improve the environment, and the history of the site); • bike racks; • lighting powered by renewable energy sources; • a rain garden for natural stormwater management.
---------------------------------	---

	The project also includes joint Ukrainian-Polish environmental events, workshops, educational campaigns, and the exchange of best practices among communities regarding the implementation of circular economy principles and an environmentally responsible lifestyle. The project will contribute to raising environmental awareness among the population, developing cross-border cooperation, and implementing practical solutions in the field of the circular economy.
Expected role of the partner institution	A partner organization from Poland will participate in the joint development and implementation of a project aimed at creating demonstration eco-spaces and promoting the principles of the circular economy in border communities. The partner is expected to: • participate in the joint planning and implementation of project activities; • participate in the exchange of experience and best practices in the fields of environmental education, waste management, and sustainable development; • implement similar or complementary environmental initiatives within its community; • jointly organize environmental events, workshops, study visits, and information campaigns; • promote the involvement of youth, residents, and local institutions in environmental activities; • participate in communicating and disseminating project results; • work together to develop approaches for implementing the principles of the circular economy and the environmentally responsible use of resources. The partnership must be based on the principles of equal cross-border cooperation, joint implementation of measures, and the achievement of long-term environmental benefits for both communities.
✓ STATEMENT I declare that I have provided my personal data voluntarily and that I have read the information clause below before giving my consent. I consent to the processing of my personal data for the purpose of searching for partners for the preparation of projects under the Interreg Poland-Ukraine Program 2021-2027.	

Лавки та елементи благоустрою
з перероблених матеріалів

Лавки, урни та інші елементи благоустрою
з переробленого пластику та вторинних матеріалів.

Інформаційні стенди

Стенди з інформацією про природу, екологію,
проект та правила поведінки на території.

Еко-стежка з QR-кодами

Еко-стежка з QR-кодами, що веде до цікавих фактів
про природу, екологічні рішення та історію місця.

Зона повторного використання
речей (Reuse point)

Місце, де речі отримують друге життя.
Візьми, що потрібно – залиши, що можеш.

Велостійки

Зручні велостійки для відвідувачів,
що сприяють розвитку сталої мобільності.

Контейнери для сортування відходів

Контейнери для роздільного збору відходів:
папір, пластик, метал, скло, органіка.

Дощовий сад (Rain garden)

Дощовий сад збирає та фільтрує дощову воду,
підтримуючи природу та запобігаючи підтопленням.

Сонячне освітлення

Сонячні світильники для екологічного
освітлення території без споживання електроенергії.
